

All masks prices increasing by \$0.45 due to increase cost of materials on 6-1-2021  
Because of Covid – 19 there has been supplies I can't get.

If you have questions please call.

I am doing the best to maintain the quality of my product.

Thank you,

Sandy

## **CHARCOAL MASKS**

**by Sandra K. DenBraber**

100% Cotton mask with charcoal filter (coconut shell). The mask contours to the face with a soft metal nosepiece enclosed in the cotton for a comfortable fit over the nose. The contour shape allow easier breathing and talking. The elastic is 100% cotton thread - ties available upon request only for an additional charge. Organic cotton available for an additional \$4.00 per mask due to higher cost of fabric and one extra wash with hydrogen peroxide. White or natural as well as colored masks are also available - call for colors. I also have seasonal prints available.

Allergic to cotton? Try a silk mask instead.

Charcoal a problem? I have lignite or bituminous charcoal available upon request or I can make the mask with extra cotton or silk filters instead of the charcoal. I also offer a 2 layer cotton filter to fit in the mask between you and the charcoal filter to decrease charcoal dust.

If you have a special request, please call.

## Sizes

- Small (child)
- Medium (petite)
- Large
- XL

Cotton mask only \$20.50

Cotton mask with ties only \$23.50

Cotton mask with Charcoal filter \$34.75

### **Pricing Subject to change**

### **CARE OF MASK**

Charcoal is dusty by nature - washing is essential to help keep dust out of the masks, so it is recommended to wash the mask and fabric filters after each use. Do not wash charcoal filter.

**No product is safe for everyone.** If you are unsure, samples of materials are available for \$3.50 (which covers shipping).

## FAQs

### **Q. What do I wash the mask in?**

A. A tolerable unscented soap, or baking soda, or hydrogen peroxide, use what you find tolerable. I air dry the mask. I do not wash the charcoal filter. If you must wash the filter you must heat dry in a low tem oven -150 degrees for ½ hour minimum until dry. The reason I do not recommend is heat releases the chemicals in the charcoal, so unless well ventilated this can be a problem.

### **Q. How long does the charcoal last?**

A. The coconut shell charcoal will hold up to 65% of its weight in chemicals but the sensitive usually does not tolerate that much. It will depend upon how sensitive you are, what you are exposed to, how you store the mask in between use.

### **Q. How do I decide size?**

A. The small is a child's size with no nosepiece, sometimes used by very petite adult. The medium is for a petite adult under 5'4". The large is for the average adult. X-large is for the bigger face and very tall. The elastic can be made longer or shorter if requested. I try to help with special sizing requests.

### **Q. How many layers of cotton in the mask?**

A. There is one layer in the front and one layer in the back giving you a total of 2 layers cotton in the mask.

### **Q. How many layer of cotton in the filters of a cotton mask with cotton filters?**

A. There are 2 - 4 layer cotton filters in a cotton mask with cotton filters.

**To Order:**

**Sandra K. DenBraber**

**114 Ray Street, Arlington, TX 76010-2724**

**(817) 469- 9626- Email: [sdenbraber@tx.rr.com](mailto:sdenbraber@tx.rr.com)**
